Make Their Influence Post In the Manogementt-The Clearing House Abelta the Commission on Certificates-Money Easy and the Market Dall Testerday.

The affairs of the Union Pacific, which are now to be settled definitely on a new basis, will be publicly rearranged toward the close of next week, probably on Thursday. At the meeting for reorganization, Mr. Charles Francis Adams will retire, to be succeeded probably by Mr. Bydney Dillon, and the new Board of Directors will include Mr. Russell Sage, Mr. Jay Gould. Mr. Alexander E. Orr. and probably Mr. Henry B. Hyde. The Vice-President who will be the manager, living at Omaha, has not yet been determined upon. This brings the two great Pacific into practical agreement, and is a long step toward the perfection of another Presidents' Agreement-the undoubted purpose of

Mr. Gould's recent efforts.

Except in the prices recorded on the Stock Exchange, there were no traces in the stock market yesterday of the events of the last two weeks. At times the market was actually dull Wall street community since the stock market tegan early in the month to foreshadow the embarrassment of Baring Brothers & Co. disappeared altogether yesterday. While no one was willing to assert that there would not be a further retreat, the feeling was general that pereafter it would be desultory, and not under fire. The suspension of Barker Brothers & Co. of Philadelphia and the run on the Citisens' Savings Bank made the street reflect

fire. The suspension of Barker Brothers & Co. of Philadelphis and the run on the Citimens' Savings Bank made the street reflect upon the possibilities of the present shaken condition of credit the world over.

Only a few stocks fluctuated widely, notably Bock Island and Missouri Pacific. The first-named declined three points and the last narrowed the difference between them by moving up-nearly two per cent. There is now a difference of less than three per cent. in the prices of the two stocks, and it looks as if Mr. Gould's prediction that the 1 rice of Missouri Pacific would cross that of Rock Island before the end of the year might be fulfilled any day. Reading stock and bonds were heavy upon the announcement of the suspension of Barker Brothers & Co., though it is not understood that the concern had any interest in securities that are sotively dealt in. Its troubles have arisen from its intimate connection with a number of undertakings to which it has advanced money upon securities which had been unmarketable and are now unavailable as collateral. Chief among these are the incelvent Orsgon Pacific Hallroad and the incelvent theretood to have been the controlling power.

With the exception of Rock Island and one or two specialities, the tone of the stock market was strong throughout. The Bank of Kagliand mails a favorable showing in its weekly statement, published yesterday morning, and as its minimum rate of discount is not advanced, an earlier feeting was encouraged both at London and at this centre. Private cable advices from London, received yesterday from leading bankers, corroborate the view printed in This Hux siew days ago that the firm of Baring Brothers & Co. is to be reorganized as a joint stock ompany. The demand for stocks in small amounts by actual buyers continues, and suggests a very serious inquiry. Are the people, who, during their investments and acquisece in whatever results may be obtained for them by the same railroad managers whose conduct has enabled those investors to buy their stocks as figures which the sconsider oheap? FRUITS OF THE BIG DECLINE.

Late as it was, Mr. George Gould went back to Mr. Bloodgood's office and there met Mr. Houston, Recompliation was effected; peace was restored. There was no pressure on Pacific Wall yesterday morning, and people, knowing the facts on which Mr. Bloodgood acted, felt that he had saved the street very considerable distress and loss. At the same time Mr. Gould has become master of the Transcontinental situation."

WHARTON BARKER'S FAILURE.

The Old Sanking Firm of Sarker Brothers & Co, Goes to the Wall. PHILADELPHIA, Nov. 20,—The failure of Barker Brothers & Co., bankers and brokers, was announced on the Stock Exchange this afternoon. The firm is composed of Abraham and Wharton Barker. The firm at 1 o'clock stopped receiving deposits at their offices at Fourth and Chestnut streets, and at 1:15 o'clock the doors were closed. The firm has of late been doing very little business through the Stock Evchange. An assignment has been made to Edward Mellor, who is the son-in-law

of Mr. Wharton Barker.
Abraham Barker, the venerable founder of the bank, is the father of Wharton Berker, the other member. He seemed overwhelmed by the catastrophe which has befallen the firm. He is one of the best-known financiers in the country, and was formerly President of the Stock Exchange.

Mr. Wharton Barker said this afternoon: The assignment is unavoidable. We hoped to be able to avert it, but it was impossible People who owed us money, and upon whom that they would do so, but they failed to meet meet ours. That is all that can be said now. Of course, the condition of the money market has much to do with the trouble. The step was necessary for the protection of our cus-tomers.

Of course, the condition of the money market has much to do with the trouble. The step was necessary for the protection of our customers."

Mr. Abraham Parzer in December, 1887, completed his fiftieth year as a successful banker, and the occasion was celebrated by a dinarer to his honorat the Bellevus, at which over eighty members of the Philadelphia Btock Exchange, sat down. Mr. Adama, the President of the Block Board, who sat at the head of the table, informally congratulating the guest of the evening, paid the following high tribute to him as a business man:

"It is rare that a man in any business can carry on his work successfully for fifty years, and it is still rarer in the banking business. To use Mr. Barker's own words. No man has ever had to ask him twice for money, nor has any man ever sued, nor has he sued any man."

In 1868 Wharton Barker became a member of the firm. The first matter which brought the house prominently before the general public was the announcement, in 1877-78, that they had become the financial agents of the Russian Government in the United States. This mission was, at that time, a highly important one, in view of war between England and Russia, which then seemed imminent. In carrying out the instructions of the Russian Government Barker Broa. & Co. produced four ships of war, suitable orvinance, and completely armed and equinped them. The total expenditure was several millions of dollars, and the whole transaction was consummated to the utmost satisfaction of Russia.

Mr. A. J. Derxel, who heard of the failure soon after it was announced, remarked to a friend: This is too bad, it could have been avoided. We would have helped them out. It seems to me there was no necessity for making the assignment."

The failure has been caused largely by various unprofitable railroad investments. Barker Bros. & Co. purchased, and a large block of which is now held by a prominent of a receiver. The Board of Directors of the company declared that the bondholders would get their money, and advised t

It is asserted that the company is certainly solvent and, with the assistance of the syndioate, will be able to tide over the crisis in its affairs caused by the failure of its precident. The Finance Company of Pennsylvania is one of the newly created investment trust companies, and had a paid up capital of \$5,000,000. It has deposits amounting to only \$150,000, due mostly to stockholders. Its creditors are said to be chiefly banks holding the company's notes, amply protected by collateral. The business of the company has been mainly the acquirement of real estate in Philadelphia for the Reading Terminal Railroad and the floating of railway securities and similar investments.

MONEY RAST IN BALTIMORE.

Banks Find it Difficult to Obtain & Per Cent, for Their Cash. BALTIMORE, Nov. 20,-The statement made yesterday that Baltimore banks were flush is borne out to-day by the action of the Clearing House, which met in pursuance to a call by President Enoch Pratt. Every bank in the city was represented, and the discussion took a wide range. The financial situation generally was gone over, and then followed a review of the local money market. Every bank. through its representative, stated that there through its representative, stated that there was more than enough money in its vaults, and that the demand for accommodation was far below expectation. Mike Stein of Stein Brothers offered to loan \$25,000 at 5 per cent, but could not find a customer. The offer had been openly made on the floor of the Stock Exchange this morning, and other banks complained that they found it difficult to obtain 5 per cent, for money. It was agreed at the meeting that the big cotton crop in the South made collections easy and accommodations unnecessary. In view of this condition of affairs and the fact that all the banks carried more than the surplus legally required, it was concluded unanimously that there was no danger of a stringency here, and that therefore precautionary measures were unnecessary.

A BETTER FEELING IN LUNDON. Steady Growth of Confidence and a Pair

LONDON, Nov. 20.-The panie on the Stock Exchange has subsided. Throughout the day there was a steady growth of confidence, and the entire absence of adverse rumors led to a investment. Favorable Bank of England returns, combined with better prices on the Continent and in New York, assisted in giving strength to the quotations. On the street the dealings showed an approach to buoyancy. American railroad securities were especially active and firm. This was partly due to large purchases to cover bear accounts. The reovery ranged from 1% to 3%. The rise in allcovery ranged from 1% to 3%. The rise in silver caused an advance in rupee paper of 2, and in Mexican railways of 3 to 5%. In foreign Government securities, Argentines advanced 2% to 3%, Mexican Government bonds 1% to 4%, and Uruguays 3%.

Discount houses in the early part of the day continued reluctant to do insiness, taking only the very best paper. Later the money market showed an easier tendency, and there was a better feeling all around. A good business was done in three months bills. Reasuring reports that the joint stock banks will assist, on moderate terms, operators requiring advances for next week's settlement has been among the leading factors in dispelling the later.

ROBBED OF HIS TIN BOX.

It Contained \$100,000 of Sconrilles, an Mr. Keller Left It in His Buggy. CHICAGO, Nov. 20.-John Keller, the million aire real estate dealer, who has an office or South Halstead street, was robbed of a tin box containing over \$100,000 worth of deeds, notes, mortgages, and other valuable collateral last evening. Mr. Keller left his office in the after noon to make a number of business calls. He left the office of the Northern Trust Company with the tin box and drove to several other business places. By 7 o'clock he arrived at a wholesale meat market on the west side. He was hardly inside fitteen minutes, but when he reursed the tin box, which he had left in the rear of the buggy box, was gone.

Mr. Keller impred into the vehicle and drove rapidly to the Desplaines street station, where he reported the robbery and offered a reward of \$500 for the return of the box. Capt. Hayes at once detailed eight detectives on the work and a thorough search of the neighborhood was made without result. There can be no doubt that it was taken by men who knew Mr. Keller and were in some way acquainted with his business. The work of replacing the papers will cost Mr. Keller thousands of dollars. left the office of the Northern Trust Company

Chleage May New Go Ahead and Propos Her Big Show.

CHICAGO, Nov. 20 .- The National World's Fair Commission resumed its labors this morn-ing. The first task in hand was the straightening out of the tangle into which the Executive Committee got itself by passing a resolution calling on the Secretary of the Treasury not to honor drafts made on him by the Foreign Affairs Committee. This occupied most of yes-terday's session, and, when adjournment was taken yesterday afternoon, two resolutions, in effect censuring the Executive Committee. were pending. At this morning's session the matter was put at rest by a resolution that the action of the Executive Committee was not intended as a discourtesy to the Foreign Affairs Secretary of the Treasury that the state of the funds available for the use of the Commission for the remainder of the year was such that

for the remainder of the year was such that strict economy on the part of all committees would be required.

The lady managers also met this morning and proceeded to the formation of a permanent organization. Mrs. Potter Palmer of Chicago was elected President.

The vexatious World's Fair alte question was settled once for all to-day. The reports of the Committee on Grounds and Buildings came up in its order during the morning's National Commission session. It was expected to cause an explosion all along the line. It contained the recommendations for the lake front over which such a squabble has arisen. The meat of the report is found in the following:

The meat of the report is found in the following:

"Resolved 1. That the question of site so happily and unanimously settled at the September meeting of this Commission, and then declared to be satisfactorily and finally settled and disposed of, shall remain undisturbed.

cut "electrical display" out of the same resolution.

Along and bitter discussion followed. Mr. Mercer opposing the resolutions warmly. When Mayor Jones of St. Louis spoke in its favor a hegira toward harmony began. President Palmer then favored the committee's report too, and as a result Commissioner Mercer's amendment was then voted down. Mr. De Young's amendment was also lost. The port of the committee was then adopted, and the site quertion was settled.

A great sigh of relief west up when the report was adopted with but one di-senting vote—Commissioner Mercer. The Wyoming gentieman died same, but he died nevertheless. The site is now settled on the terms given in the Martindale resolution.

The cashier paid Adams \$183, and the package. The cashier paid Adams \$183, and the package was forwarded to the main office of the American Express Company. In the meantime Adams had quitted the city. The package was opened and was found to contain a large number of letters to the management of the American Express Company, which would be, for their signatures, valuable to an autograph collector. The letters were genial acknowledgments from the late William H. Vanderbilt, Cornelius Vanderbilt, and other equally well-known men of the receipt from the American Express Company of franks, entitling them to send packages, free of cost, on any of the company's lines of service.

Complaint against Adams was made to District Attorney Fellows, and the indictment for grand larceny in the second degree was found. But Adams, though traced to California, was not heard from definitely until a few days ago, when an employee of the American Express Company saw him on a Staten Island forry-boat wearing the uniform of an artilleryman in the United States army. Extensive Carpet Manufacturing

Among the largest manufacturers of carpets in this country are J. & S. Dobson. Their factories, located in New York State, turn out millions of yards each year, and the tall building which represents the retail part of the bus-iness in Fourteenth street, between Fifth and Sixth avenues, is filled from top to bottom with floor coverings which illustrate every novelty in weave, pattern, and color, from the most inexpensive ingraius to the rarest and costliest but a slight advance over wholesale prices. The only imported goods in stock are rugs and mats of Oriental make. The establishment is one of the beat fitted to show such goods in New York, an open rotunds which extends from ground to roof in the centre furnishing additional light to each story, as well as serving for an effective background to the choice rugs and art squares, which are draped from the railings. Each of the five floors is devoted to special makes of carpets, affording a variety that is really embarrassing. There seems to be nothing specially new in colors. At present, although every shade is represented terracotta, old rose, and the warmer tints are the best selling, in place of the gray cream, and delicate blues which had the lead last spring. Every once in a while at these large houses there is a drive in various manufactures to clear them out. Buch a one is now in progress at Dobson's; velvets, body brussels, and inquestioned bargains.

The carpeting of the new hotel at Old Point Comfort has just been completed by this firm 4.00 yards of floor coverings, not to speak of rugs and mats by the dozen, having been laid. mats of Oriental make. The establishment is

CONCORD. N. H., Nov. 20,-The strike of the rranite cutters bids fair to be speedily adudged. President Batterson has practically accepted the proposition for arbitration sub accepted the proposition for arbitration sub-mitted last evening, and a conference of the other manufacturers to-day resulted in an unanimous vote that Mr. Batterson select an arbitrator for them. Mr. Batterson will arbi-trate and the cutters will name theirs, and these two will appoints third. The men will probably resume work on Monday.

filed a bill in the United States Circuit Court in Baltimore against the Baltimore and Ohio Railroad, and the Baltimore and Ohio Telegraph Company. The bill alleges that the complainant recovered recently a judgment against the Baltimore and Ohio Telegraph Company for \$25,000 and costs, which it has been unable to collect; that the reason is that the Baltimore and Ohio Telegraph Company has been made insolvent by the action of the has been made insolvent by the action of the railroad company in seiling all of its property to the Western Union Company, for which it received stock of the Western Union to the value of about \$4,000,000. This sale, it is alleged, is a violation of the rights of the complainant and other creditors of the Baltimore and Ohio Telergaph Company, at it is also alleged that the railroad company was the sole owner of the telegraph company's stock, and is therefore liable for its debts. The bill prays for a receiver of the Baltimore and Ohio Telegraph Company, and that the railroad be required to account to the creditors of the telegraph company for so much of the \$4,000,000 received by it as may be necessary to satisfy the claims of the complainant and all other creditors who may come into the case.

A Chicago despatch says the Chicago and Grand Trunk has named George M. Bogue of that city arbitrator to decide the question of differential rates on dressed beef via Montrea to Boston, and the Lake Shore has named A. J. Cassett, formerly Vice-Fresident of the Pennsylvania Raiiroad. It is understood both gentlemen have consented to serve.

A Chicago despatch says the Post Office De A Chicago despatch says the Post Office Department has made arrangements for a new fast mail train that for speed will beat all the efforts heretofore made in that line. It will run over the New York Central and Lake Shore, and will cover the distance between New York and Ohicago in just twenty-four hours. The new train will be made up wholly of postal ears, and will leave, New York at 9:10 A. M. At the same hour next marning it will reach Chicago. This will be one hour and forty minutes less time than is consumed by the present fast mail. All the mail matter will be made up en route, and deliveries will be made at all stations between this and Buffalo, but no stops will be made.

but no stops will be made.

A Chicago despatch says through the efforts of Chairman Midgely of the Western Freight Association, the date on which the revised rates on hoge and packing house product are to become effective has been changed by the Inter-State Commerce Commission from Nov. 25 to Dec. 22. This is the second postponement. Instead of convening a special meeting, the managers can now wait until the regular December session to agree upon a basis of equalizing rates. Meantime no change will be made by any road, the Chicago and Alton having consented to wait until its competitors are ready to act. There is hope that the Alton will recede from its proposal to reduce the hog rate from 25 cents to 18 cents per 100 pounds from Kansas City to Chicago. The hope is founded upon a probability that the Kansas City packers, whose interests the Alton will not antagonize, will consent to a higher figure.

Chairman Midgely of the Western Freight Chairman Midgely of the Western Freight

Chairman Midgely of the Weatern Freight Association yesterday issued a call for a meeting of all the Western roads Dec. 2, to consider the question of a general advance in rates. Steps will be taken, it is said, to organize a new association of no less magnitude than the late inter-State Commerce Railway Association, with an agreement somewhat in the form of the "Clearing House scheme" that has so long been under consideration.

IRVINGTON, Nov. 20.-Conductor C. E. Nolan,

Engineer Parker, and Fireman Ed Clement had a narrow escape from being killed in a freight wreck at this place this afternoon. At So'clock a way freight was standing on the south track when Nolan's train, a through freight from Albany, rounded the curve at full speed. Parker reversed his engine, but could not stop!t. Nolan and Clemens jumped from the train, but Parker stuck to his post until the crash came. Then he sprang from the cab in time to save his life. He had no sconer landed on the ground than the huge locomotive, one of the largest on the road, and known as the Mogul, crashed and toppled into the Hudson River with the cabouse on top of it. Parker was severely burned about the face by the fire in the engine. Five cars were wrecked. Travel was blocked for several hours, and at 6 o'clock two wreckers succeeded in clearing the track sufficient to allow the train to pass. So'clock a way freight was standing on the

SOME SPICY TRIALS AHEAD. Addarts that Will be Rebutted by Some

Interesting Swearing. Julius Barder, as Chairman of the Committee on Protests of the A. L., has sent copies of charges filed at the late championship meeting at Washington against A. F. Copland, M. A. C.; C. A. J. Queckberner, M. A. C.; J. S. Mitchell, N. Y. A. C., and A. G. Nicker-M. A. C.; J. S. Mitchell, N. Y. A. C., and A. G. Nickerson, N. Y. A. C., to the accused and their clubs. All the men will waive the thirty days' grace allowed them, and the trials will take place in a week or so. Copland, querkberner, and Mitchell have their amateur standing assailed, while the protest against Nickerson is made on a technical point.

The charges against Mitchell are: J. That he has taken money from the students or offices of Frinceton College for giving lessons or instructions to such students in heavy, weight throwing. 2. That he has compoted or exhibited for money at the Tuscarora Chowder Club picnic or games on biaten listed.

The charges against Copland is that in August 1868, at Ocsanport, Moumouth country, N. J., he ran a foot race of 100 yards for a purse of mosey, won the race, and received the morey.

attractive the money.

It is a contractive the second of the summers of 1882 and 1883, for which he received money compensation.

likes and 1883, for which he received money compansa-tion.

Nickerson is protested on the ground that he was not a member of the New York A. C. when, on Oct. 11, 1883, he won the A. A. U. high imping championsing.

The Sisten Island charge signist Mitchell is a new one, evidently picked up since Oct. 11. It will prove a difficult task to bring home the charge of professional-iam against Copland. The New York A. C. has the affidevit of a man who claims to have seen the money paid over to the runner, but "Cope" will have wit-nesses in rebutted, and some tall awearing promises on riven the sase. At the time charged, Copland and "Suen" white were connected with Lon Myerse stable and were in the vicinity of Oceanport daily. The testingory will be of the contradictory kind, and the Scotch verdict, "not proven," will be the probable result.

THE VESTAL MURDER MYSTERY.

Interest in It Revived by Recent Discov-MIDDLETOWN, N. Y., Nov. 20.-Sheriff Stone

and Coroner Pierce of Broome county have peen called upon to investigate some new derelopments in what is known as the Vestal sragedy, which lead to the conclusion that it was a case of two-fold murder. It will be remembered that in August last the dead body of Abdallah Haddad, a Turkish peddier of notions and trinkets, who was well known in the neighborhood, was found hidden in a secluded spot in the town of Vestal. The peddler had been murdered and robbed of his pack and other valuables. When last seen alive by persons residing in the vicinity be was in company with two of his countrymen, who were also peddlers. One of these was a boy of about 18 years and the other was a tig, tracular tooking fellow of middle age.

When the murder was discovered an active search was act on foot in all directions by the country criminal authorities for the muriered man's companions, but neither of them has since been seen. Now it appears that the bey, who was perhaps Haddad's son, was also killed, and suspicion points strongly to the big Turk as the murderer. One day last week a farmer found in a pond, not far from the spot where Haddad's body was discovered, a box of cheap trinkets and some articles of clothing which are believed to have belonged to the missing boy, and which the murderer probably couldn't well carry away without danger of detection. The discovery has awakened new interest in the tragedy, and pretty much everybody in the town is taking part in the search for the bedy of the missing boy. in company with two of his countrymen, who
